# Mapping dwarfism (Plant height/Plant Girth at flowering) by a LMM approach

Kivumbi Muganga

10 November, 2026

### MAPPING C1&C2 plant height/girth ratio by a LMM approach

```
## Test for marker.id: 1 → M_0001

## Loading required namespace: testthat

## Test for marker.id: 2 → M_0002

## Test for marker.id: 3 → M_0003

## Test for marker.id: 4 → M_0004

## Test for marker.id: 5 → M_0005

## Test for marker.id: 6 → M_0006

## Test for marker.id: 7 → M_0007

## Test for marker.id: 8 → M_0008

## Test for marker.id: 9 → M_0009

## Test for marker.id: 10 → M_0010

## Test for marker.id: 11 → M_0011

## Test for marker.id: 12 → M_0012

## Test for marker.id: 13 → M_0013

## Test for marker.id: 14 → M_0014

## Test for marker.id: 15 → M_0015

## Test for marker.id: 16 → M_0016
```

```
## Test for marker.id: 17 → M_0017

## Test for marker.id: 18 → M_0018

## Test for marker.id: 19 → M_0019

## Test for marker.id: 20 → M_0020

## [1] 20
```

visualization of the C1&C2 mapping results in a manhattan plot and histogram of pvalues
